WHAT IS PARAPLUIE?

*Parapluie* is a fast & competitive multiplayer race game. Each player must lead a cyclist in a maze to find the hidden “treasure”. The first to return it to the exit win the game. The game is about dexterity and spatial orientation since you’re running into different corridors.

HOW TO PLAY?

How to move the avatar

Each player controls the movement of their avatar with 2 Sifteo cubes. By simply connecting their cubes, the avatar shift from one cube to another.

Connecting the cubes...

...to shift the avatar in a corridor.
Rule of movement

A movement is allowed when the player connect the passive cube (notified by the “umbrella” icon) to the active one. Moreover, it has to be connected to an opening of a corridor to allow the avatar to shift into that direction. Doing so, it will move it and reveal the next section of the level.

**BEAT YOUR FRIENDS, PRACTICE ALONE**

*Parapluie* is mainly designed for a multiplayer experience. Currently you can play with one or two other friends (2 cubes/players)

However you can also play *Parapluie* as a single game. By playing alone, the main objective would be very similar to a “time attack” mode, where the player competes against his own record. Right now the one-player mode does not display a time record or a high score, but it would definitely be a relevant feature to add for a new iteration.

**ABOUT THE PROJECT**

The current prototype has been designed by the French indie collective One Life Remains for the Sifteo Cubes Competition hold by the Experimental Games Projects (January, 2013).

The prototype is available at: [http://www.oneliferemains.com/games/parapluie/parapluie.elf](http://www.oneliferemains.com/games/parapluie/parapluie.elf)

A one-minute video showing a trailer of the prototype being played is online: [http://vimeo.com/58656910](http://vimeo.com/58656910)

A short gameplay video showing a single game played by a player: [http://www.youtube.com/watch?v=hHZZ1YCeli8&feature=youtu.be](http://www.youtube.com/watch?v=hHZZ1YCeli8&feature=youtu.be)
